THIS IS UNEVALUATED INFORMATION

50X1

**1. Identification Data**

Reference is made to page 3, an overlay of GSGS 4416, Middle Danube, Sheet U-12, Hranice, Scale 1:100,000, showing location of the Meopta Optical Plant in Prerov (N 49-27, E 17-27):

1. Kozlovska Street, asphalt, six to seven meters wide, good condition, sand pedestrian walks on either side. Street led from Prerov to the village of Kozlovice (N 49-36, E 18-16) and ran parallel to north perimeter of the Meopta plant area.
2. Meopta Optical Equipment Plant (see page 4).
3. Hospital area, name unknown, located across Kozlovska Street from Meopta.

**2. Plant Layout**

Reference is made to page 4, memory sketch of Meopta Optical Equipment Plant in Prerov, on which source identified:

1. Hospital area (same as point 3, page 3) surrounded by a two-meter-high mesh wire fence. Five to six two-and-three-story buildings were located here.
2. Street (same as point 1, page 3).

-2-

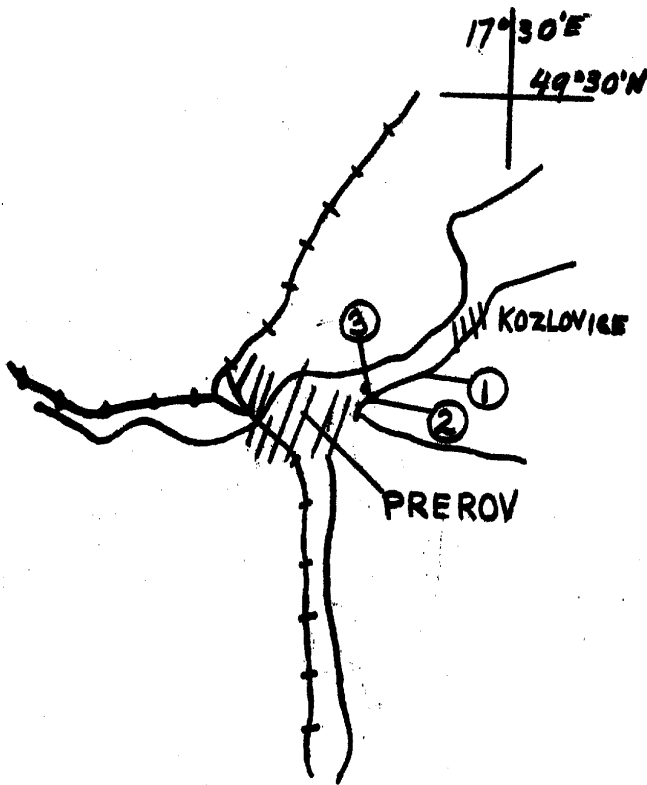

3. Entrance and guard post, guarded 24 hours daily by one civilian guard on each shift.
4. Building, brick, four-story, painted grey, 200x60x20 meters, type of roof and purpose of building unknown.
5. Two entrances into the building, four meters wide, used by personnel and vehicles. 50X1
6. Two yards, 25x15 meters, cobblestone surface. [redacted] empty and full wooden boxes (100x60x10 centimeters) here, contents unknown, and transported them to the Prerov railroad station. [redacted] stamps on the boxes: Sklo (glass); Neklopit (Do Not Tilt Over). 50X1
7. Plant's soccer field.
8. Civilian homes for employees of the Meopta plant, brick, five-story, located about 100 meters west of the plant. Approximately five wooden targets; round, one meter in diameter, painted black and white, were placed directly below the roofs of the houses. [redacted] in 1953 (month unknown) that aircraft gun sights were tested against these targets. The plant worked in three shifts. Source had no further information regarding the plant, production or labor force. 50X1
